

STRUCTURAL ENGINEERING

Whether it's the historical rehabilitation of a 120-year old school house to the design of a new primary school, or the design of the local park pavilion to the planning and design of a multi-use development complex, we do it all. Our engineers work closely with clients and other design team members to understand the needs of each project and provide effective and creative solutions. Whatever the market, from coast to coast, our team has extensive experience providing structural planning, design, construction administration, and evaluation services. We're passionate about what we do. How can we support your project's ambitions?
